

I enjoying the convieneince of having the traffic and weather channel available to me 24 hrs/day. And I pay for that convenience. This is not a service that I can always get from a local public station. You see I'm a truck driver and local stations that come in, and they don't always, don't always tell you about traffic and weather, at least not in a timely fashion. Having the ability to switch to a station that is dedicated to this kind of service at a moments notice is what prompted me to get my satalite radio in the first place. I urge you to reject the NAB's petition 04-160.

Thanks for your consideration,
Kirk Kibbey
